

LegalWorks & Apple Computers

LegalWorks is compatible with Macs. When using LegalWorks on a Mac, all features work except for the Outlook add-in. If you'd like all features, including the Outlook add-in, we recommend accessing LegalWorks via Parallels.

Parallels

Parallels is virtualization software that allows Apple computers to run a copy of Microsoft Windows alongside the native MacOS.

REQUIREMENTS

Most modern Macs will be able to run Parallels.

	Minimum	Recommended
CPU	Intel Core 2 Duo Intel Core M Intel Core i3	Intel Core i5, Core 7 Intel Xeon
RAM (Memory)	4GB	8GB or more
Disk Space (Storage)	5 GB	10GB or more (depending on workload in Windows)
OS Version	OS X Yosemite (10.10.5)	macOS Sierra 10.12 or later

PURCHASING PARALLELS

Uptime recommends purchasing directly from the vendors (Parallels, Microsoft) when possible, to avoid licensing issues.

- Parallels Desktop (standard edition, perpetual/non-subscription)
- Microsoft Windows 10 Pro

GETTING SET UP

Uptime will assist with installation of Parallels, Windows, and related software when recommended for use with Uptime products such as LegalWorks or Practice. Uptime Legal will provide best-effort support for these products at Uptime's discretion.
